VIRTUAL ROUNDTABLE DISCUSSION

Opening Remarks & Agenda

Virtual Discussion and Cases Studies on How to Turn Disruption and Change into Opportunity and Advantage

Charley Larsen
RN Program Director, Arizona Surge Line
Arizona Department of Health
(Healthcare Access Orchestration - AZ)

Angie Franks
CEO, Central Logic
(Healthcare Access Orchestration - AZ)

Ellen Gerstein
Executive Director / CEO, Gwinnett Coalition
for Health and Human Services
(Actionable Community Intelligence - GA)

Al Faber
CEO, Baldrige Foundation
(Host)

Dr. Roger Spoelman
Experienced Health System CEO
Burrus Research Futurist
Community Leader
Muskegon County
Covid-19 Response Team
(Facilitator)

Eric Epley
Executive Director / CEO, STRAC
(Healthcare Access Orchestration - TX)

Jennifer Strahan
COO, SOAR Vision Group
(Actionable Community Intelligence - GA)

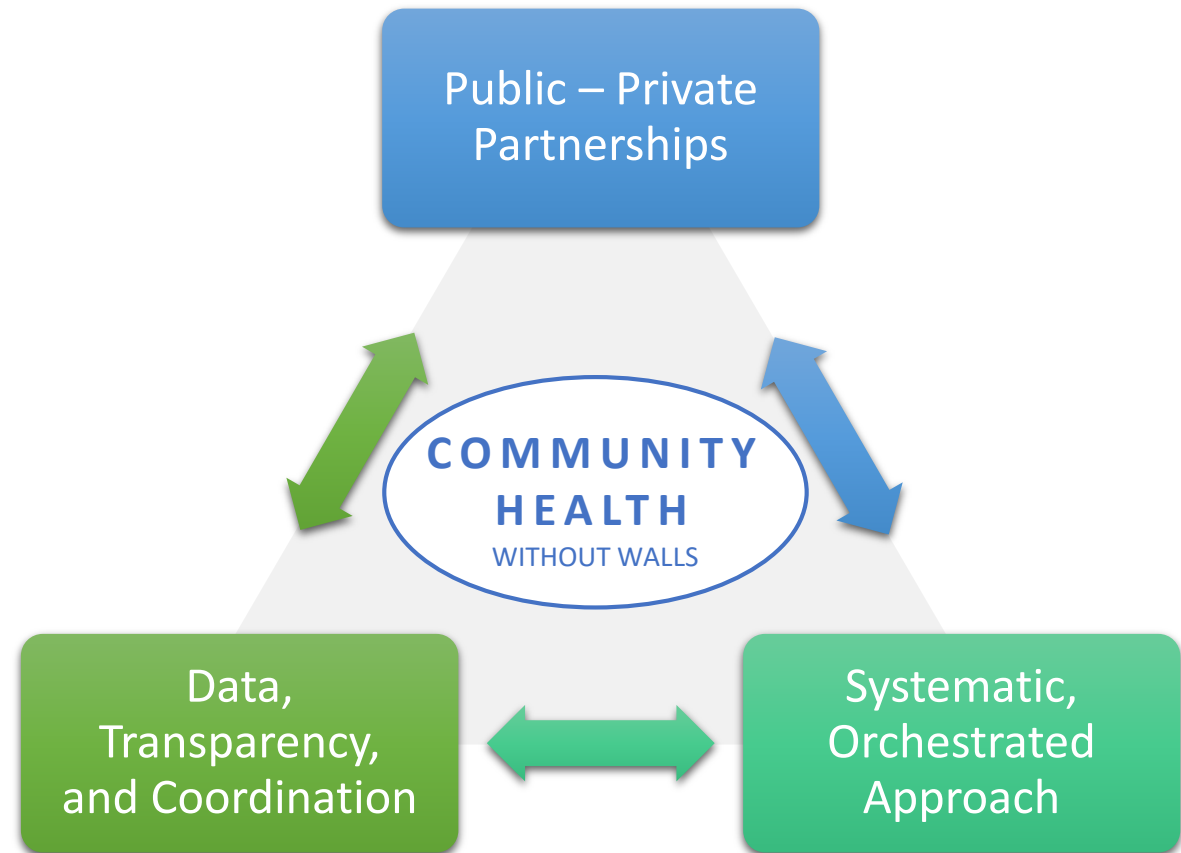

COVID-19 OPPORTUNITY OR SET-BACK:
CREATING COMMUNITY HEALTH WITHOUT WALLS

Reframe and Reset

Key Learning Objectives:

1. Establish new **public/private partnerships** to maximize expertise and build community-wide capacity
2. Discover how to use **data, transparency, and coordination** to drive nimble, efficient, and responsible actions
3. Create a **systematic, strategic, & orchestrated approach** to community health without walls

Reframing the Problem: Frontline Insights

States & Jurisdictions

- Keep residents safe
- Manage public concern and re-establish trust
- Assess new and ongoing threats
- Enhance interagency coordination
- Strengthen workforce and economic recovery plan
- Establish equitable resource utilization

*“How do we balance **competing short-term needs** with **long-term priorities**?”*

Health Systems

- Keep the doors open via volume regeneration and expense reductions
- Maintain employee health and engagement
- Address supplier shortages
- Stay aware of the most up-to-date recommendations

*“How can we be more **prepared** and **agile** in our responses and actions?”*

Leaders

- Access relevant, timely data and information
- Transparency and accountability for agreed upon actions and deliverables
- The ability to not drive blind, particularly in this time of transition and chaos

Elevating COMMUNITIES

TO SOLVE COMPLEX PROBLEMS TOGETHER

SHARE with PEERS

**INNOVATION
SHARED LEARNING LABS**
August '20

OBJECTIVE

- Learn and share COVID-19 best practices and case studies with other Community Leaders via engaging, interactive sessions

DELIVERABLES

- Research-based national survey, published white paper, and shared executive summary

UPCOMING DATES – REGISTER NOW!

- Tuesday, Aug 11 @ 1 pm EST
- Thursday, Aug 13 @ 1 pm EST

ACT with INNOVATORS

**COLLABORATIVE
COMMUNITY COHORTS**
August '20 – July '21

OBJECTIVE

- Move to action w/ select community peers guided by experts, PuLSE &/or Central Logic technology, and Baldrige Community Initiatives Framework to achieve community goals

DELIVERABLES

- PuLSE Community Technology and Baldrige Community implementation, and published intervention-based research

CONTINUE the CONVERSATION

**AO2 SUMMIT ON HEALTHCARE
ACCESS & ORCHESTRATION**
September '20

OBJECTIVE

- Interact with healthcare influencers to hear tried and true best practices to guide patients safely and effectively throughout the patient care continuum

REGISTER NOW – September 15, 2020

Healthcare Access and Orchestration:

Arizona

- Public – private partnership creating a “system of care” for the residents of Arizona
- Anticipatory response
- Health system collaboration, consensus and trust
- Exceptional leadership
- People, process & technology to facilitate access to care due for COVID patient surge
- Ability to load balance demand so no hospital becomes overwhelmed
- Visibility to beds, ventilators, critical care staff

Key Considerations

- Entire state-wide visibility
- Real-time data
- Fully automated system that pulls feeds from all health systems
- EMR vendor-agnostic
- Highly interoperable
- Azure cloud-based application
- Up and running in under 2 weeks

THE ARIZONA
SURGELINE

Healthcare Access and Orchestration: Texas

Without visibility to your health system's resources,
you cannot optimize access and care.

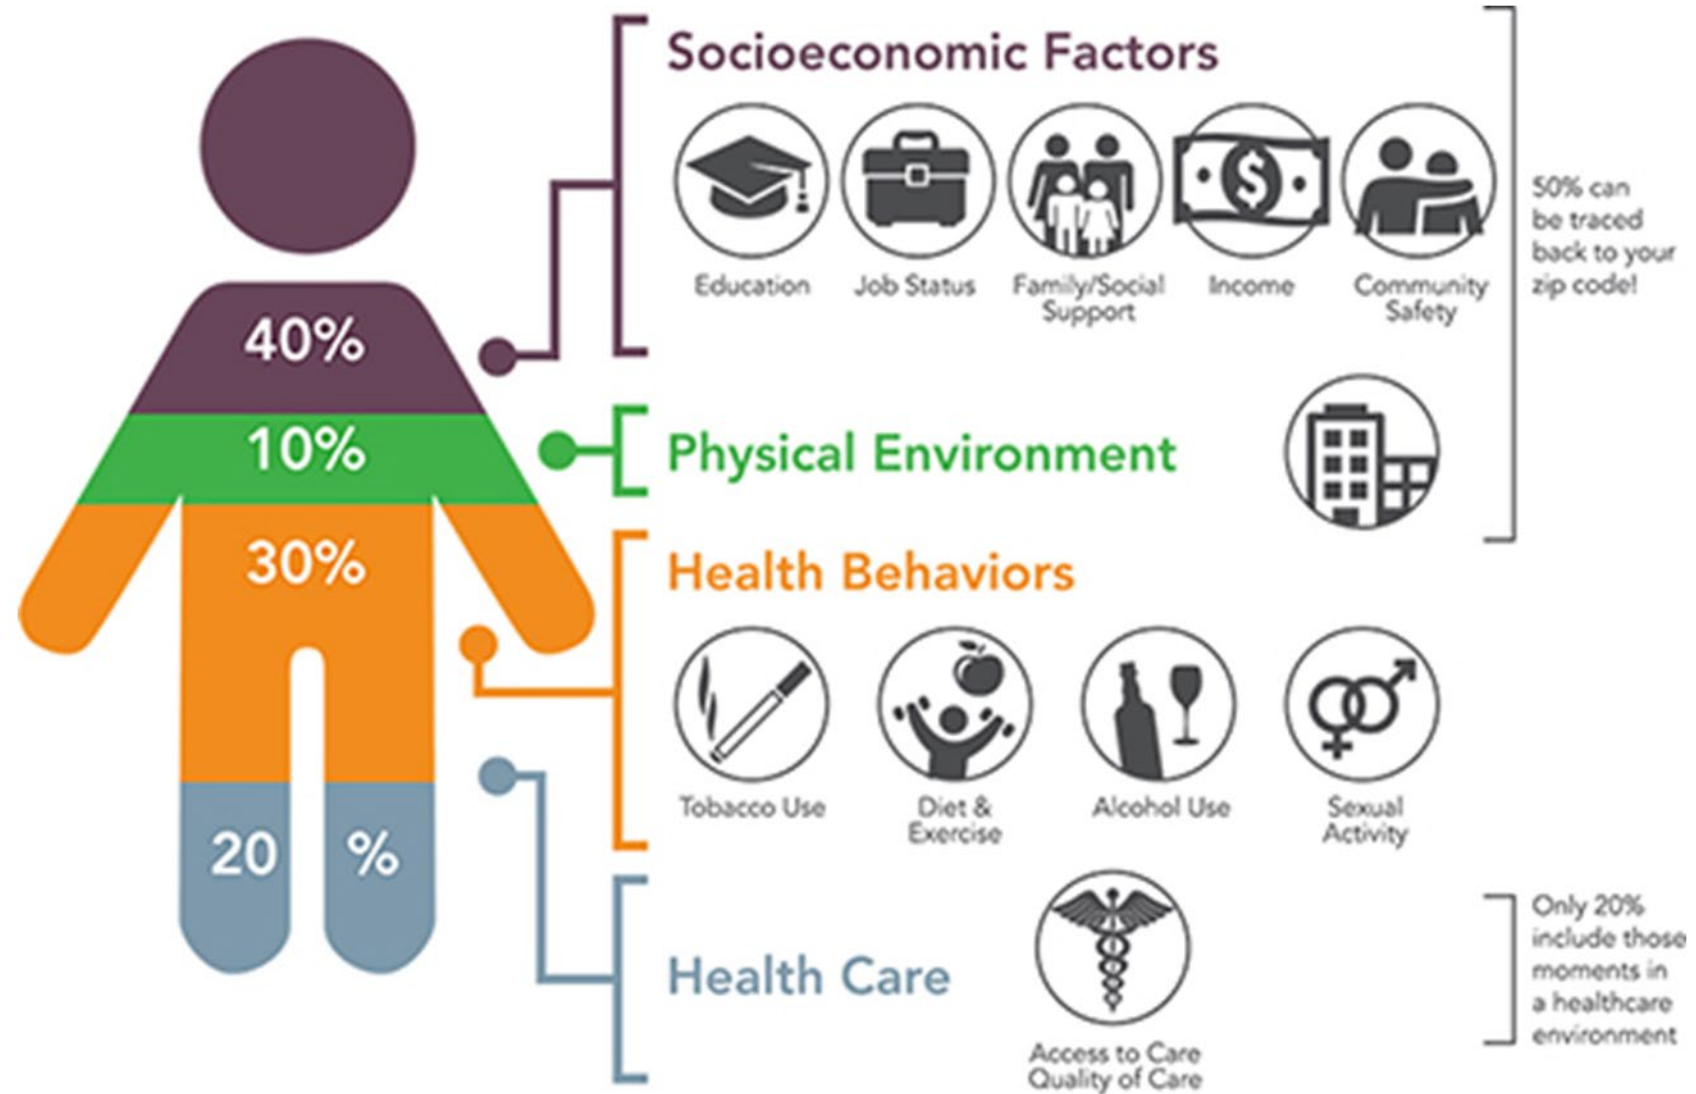

About STRAC

- Southwest Texas Regional Advisory Council
- Develop, implement and maintain the regional trauma and emergency healthcare system for 22 counties
- Consists of 74 general and specialty hospitals

From Symptomatic to Systematic

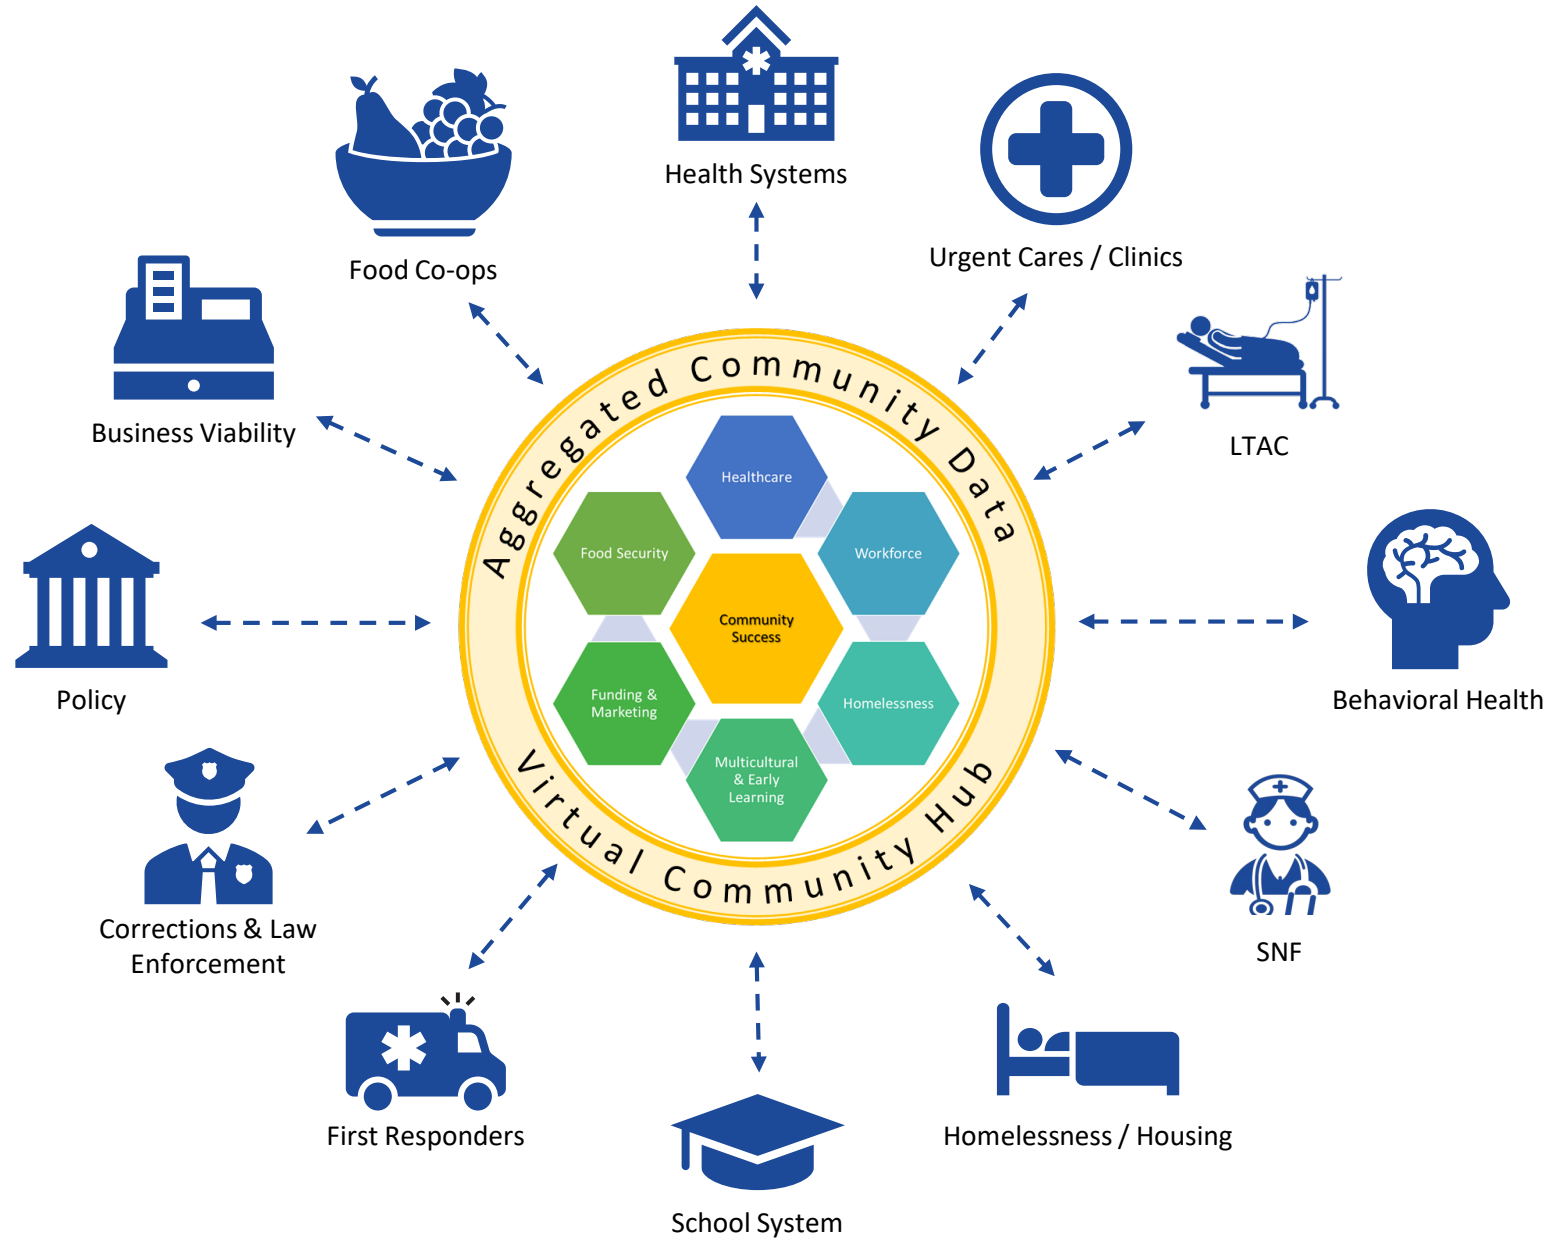

- Social **Determinants** or Social **Interdependencies**¹?
- Hospitals and health systems are not insular
- Communities are central
- Public / Private partnerships are critical

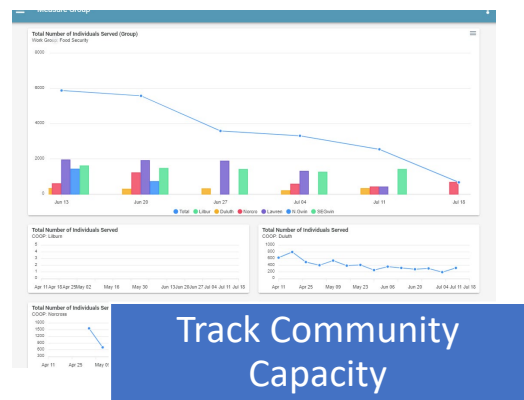

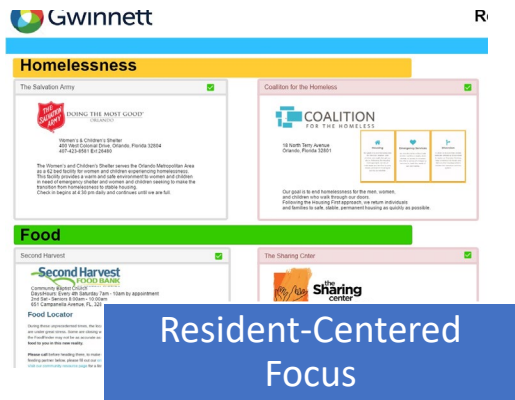

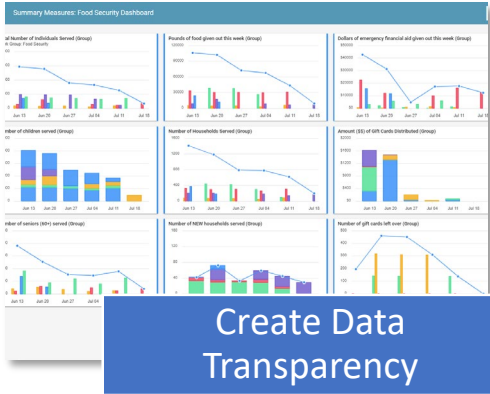

Source: Institute for Clinical Systems Improvement, Going Beyond Clinical Walls: Solving Complex Problems (October 2014)

From Symptomatic to Systematic

- Well coordinated, orchestrated action must replace fragmented and siloed efforts
- Meaningful, transparent data must become the norm
- Requires resource visibility, coordinated planning of services, volume / service allocation

OBJECTIVES

APPROACH

- Recognizing the diverse needs of residents, we created **seven multidisciplinary, interagency working teams** to respond to community needs through the COVID-19 pandemic and beyond

- Piloted **PuLSE Community** software within the Food Security working team

COMMUNITY PILOT PHASE IMPACT

3x – 10x Increased service volume for participating Gwinnett County Food Co-ops through the COVID-19 pandemic

Measure	Community Value
Total Number of Individuals Served	85,595
Pounds of Food Distributed	1,609,671
Dollars of Emergency Financial Aid Distributed*	\$ 551,744.68
